

LTC at Home Readiness Checklist

Is Your Pharmacy Ready to Bill for Long Term Care at Home?

Long Term Care at Home is a Medicare-supported model that allows pharmacies to bill LTC-level dispensing fees for homebound patients who need the same medication support they'd receive in a long-term care facility, but prefer to age in place.

If your pharmacy is already delivering meds, providing adherence packaging, and managing complex regimens, you're likely doing the work. Now it's time to get paid for it!

Why Add LTC at Home?

- Unlock higher dispensing fees through Medicare Part D
- Provide continuity of care for aging-in-place patients
- Help your pharmacy grow revenue without expanding footprint
- Reduce hospitalizations through adherence-driven services

Before You Bill: Your Pharmacy Must Have these items in Place

Licensing & Operational

- ☐ A separate NPI number for LTC
- ☐ A separate NCPDP number for LTC
- ☐ Clearly separated inventory for retail and LTC operations
- ☐ Appropriate state licensure for LTC services (if required)

Service Capabilities

- ☐ Ability to provide adherence packaging
- ☐ Capability to provide or coordinate IV medications
- ☐ In-house or partner support for non-sterile compounding
- ☐ A reliable delivery service with documentation
- ☐ Access to an on-call pharmacist 24/7
- ☐ Ability to supply emergency kits and maintain logs (if needed)

Once Billing Starts: Compliance Documentation to Maintain

- ☐ A documented LTC at Home Policy & Procedure
- ☐ A completed Patient Eligibility Worksheet for each LTC patient
- ☐ Monthly cycle-fill processes and DUR reviews
- ☐ Records of caregiver and prescriber communication
- ☐ Ongoing inventory audits and reconciliation
- ☐ Compliance with USP <795>, <797>, and <800> where applicable
- ☐ HIPAA-secure records and communication tools

Need Help on the P&P? We've Got You Covered.

Our LTC at Home Compliance Program gives you a complete LTC at Home policy, 7 additional policies to support the CMS LTC at Home guidance, eligibility attestation and implementation checklist. Designed for independent pharmacies, it's self-service, easy to implement, and built with CMS and PBM expectations in mind.
